SUMMARY

Senior Software Engineer with 8 years of experience specializing in building high-performance APIs and data integration solutions. Expert in AWS cloud architecture and Python development, with proven success in optimizing large-scale ETL pipelines that reduced processing time by 92%. Demonstrated expertise in SQL optimization achieving 98% efficiency in data management systems handling 100K+ daily transactions. Track record of architecting scalable API solutions that drive business growth through improved data accessibility and system performance.

EXPERIENCE

Senior Software Engineer

Deloitte USI

📅 08/2022 - Present 📍 Chennai, India

- Led the design and architecture of a semantic API solution, improving system reliability by 99.9% and reducing latency by 92% through microservices implementation and performance engineering
- Architected distributed system handling 1M+ daily requests, reducing operational costs by 40% through efficient resource utilization
- Spearheaded implementation of automated testing framework, achieving 90% code coverage and reducing bug detection time by 60%
- Optimized ETL processes reducing data processing time from 3 hours to 15 minutes, improving data freshness by 92%
- Led cross-functional team of 8 engineers, delivering 12 major features while maintaining 99.9% system uptime

Senior Software Engineer

Cognizant Technology Solutions

📅 03/2022 - 07/2022 📍 Chennai, India

- Designed and implemented RESTful APIs serving 50K+ users with 93% build success rate through robust error handling and performance optimization
- Architected secure authentication system managing 50K+ user sessions with zero security breaches
- Enhanced system performance by optimizing database queries, reducing average response time by 45%
- Implemented scalable CI/CD pipeline handling 50+ daily deployments across multiple environments, reducing deployment time from 2 hours to 15 minutes while maintaining 99.9% success rate

Software Engineer

Cognizant Technology Solutions

📅 07/2019 - 02/2022 📍 Chennai, India

- Built serverless notification system processing 100K+ daily events with 98% delivery rate using AWS Lambda and S3
- Managed end-to-end data lifecycle management system with 98% accuracy including data purging, updates, and migrations to maintain data integrity and meet compliance standards
- Indulged in creating SQL scripts for creating, modifying and deleting records as per client request with an efficiency of 98%
- Developed monitoring system reducing incident response time by 60% through automated alerting and diagnostics

Programmer Analyst

Cognizant Technology Solutions

📅 02/2017 - 06/2019 📍 Chennai, India

- Handled programming tasks for and maintained 7 internal websites with a high success rate (97%) in product update deployment
- Handled CRUD applications to fetch data
- Developed RESTful APIs handling 50K+ requests/day with average response time under 100ms
- Implemented automated testing reducing regression bugs by 70% and improving deployment confidence

SKILLS

Agile Methodology		Airflow	API
API Design	AWS	AWS Lambda	
AWS EC2	AWS API Gateway		AWS S3
Azure Pipelines	Bruno	CI/CD	CSS
Concourse	Data Integration		Django
Docker	ElasticSearch	ETL	Flask
Fast API	Git	HTML	JIRA
Microservices	MongoDB	MySQL	
NoSQL	Postgres	Postman	Python
RESTful API	Spark	SQL	Security
Technical Leadership		Unit Testing	

KEY ACHIEVEMENTS

-  **Data Management Excellence**
Achieved a 98% efficiency in SQL data management, significantly enhancing client satisfaction.
-  **Product Delivery Optimization**
Boosted product delivery speed by 92%, optimizing critical ETL processes for efficiency.
-  **API Service Innovation**
Developed automated system with 93% build success, improving data intake efficiency.
-  **Website Update Management**
Maintained 97% success rate in deploying website updates, ensuring system reliability.
